Large-scale overlay of Mount Etna - Sicily on **Bing Roads/Google Terrain/OpenStreetMap** base layers.

{WISroGIS map_id='14' ~}

The **overlayed KML image** shows Mount Etna erupting on July 13th, 2001. The same image is overlayed **twice - 100% and 50% opacity**. *Disable* the 100% image to see the transparent overlay of eruption on top of the selected base layer.
