Various travel locations from around the world. Short description of placemarks courtesy to wikipedia.org

.

Map's initial **position** and **zoom level** is **automatically determined** so that all placemarks are visible within initial extent.

```
{WISroGIS map_id='20' ~}
```

For placemarks the corresponding **country flag icon** was used. The coordinates (map location) was determined by city & country Google **address geocoding**

.

Sample weather location added by enabling on map's configuration the [Yahoo Weather plugin](#) (part of WISroGIS Power Pack).
