

This article shows a demo **OrdnanceSurvey OpenSpace** map, with **Google Hybrid** and **Yahoo Satellite** exchangeable base layers. An **additional WMS layer** allows to see the **plans on of Britain** in the the **1940s** and **1950s** - OS New Popular Edition layer.

{WISroGIS map_id='12' ~}

Please note there the slight difference on base layers positioning - this is caused by projection transformation and fixed resolutions used by OpenSpace layer.
