

Joomla articles geotagging

Written by Administrator

Wednesday, 01 December 2010 00:53 - Last Updated Wednesday, 01 December 2010 01:26

This is a sample map for **article geotagging**; it shows an **overlay** with the articles from 'Latest Maps' category for which the **geotagging information** was set. All articles share the layer's chosen icon, unless a specific icon is set for an article.

The map's center is **automatically computed** so that all articles are visible in the initial map's extent. When **adding a new geotag** to an article or **change** an existing one, **no map changes are required**.

{WISroGIS map_id='18' ~}

Click the '**Read more**' link at the bottom of bubble info to view the **full article** and see each map in action.
